Foreword

WITH THE enactment of the health insurance program for the aged (Medicare), it became possible for the first time to organize a continuing information system to report the use of health care services by older Americans. Since Medicare began, one of the basic tasks has been to process and pay claims for covered medical services submitted by or on behalf of all aged persons who are entitled to hospital insurance benefits and those voluntarily enrolled for supplementary medical insurance benefits. From this operation come data on the amount, kind, and cost of medical services used by the aged.

This report is one of a series of publications designed to disseminate such data on a regular basis. It provides detailed statistical information on the characteristics of persons insured under Medicare. The series includes other reports on the number and characteristics of participating providers and on the utilization of medical care services. A listing of these reports appears on the inside cover. The reports are intended to give a comprehensive account of the amounts reimbursed under the program, the kinds of services paid for, and the variations in utilization and reimbursement by age, race, and sex of the beneficiary, as well as his place of geographic residence. Such data can provide new insights into the patterns of medical care for persons aged 65 and over. A fuller understanding of present practice can contribute to improved health services not only for the aged but for the general population as well.

Many individuals in the Social Security Administration have assisted with the development of this series. The preparation of the reports is a function of the Division of Health Insurance Studies of the Office of Research and Statistics under the supervision of Howard West, Director, and Aaron Krute, Deputy Director. Important contributions for the tabulation and presentation of the statistical content of this report were made by Theodosia P. Rasberry and Robert J. Butler of the Statistical Processing and Procedures Branch and Joyce B. Ragin of the Program Statistics Branch of that division. Text preparation was the responsibility of Martin Ruther of the Program Statistics Branch. Special acknowledgments for computer for Automated Tabular Composition," a computer services are made to the Division of Health Insurance Statistical Data, Bureau of Data Processing.

The General Tables were produced by the "System for Automated Tabular Composition," a computer system, at the Social Security Administration headquarters in Baltimore, Maryland. They were photo typeset on Linotron equipment at the Government Printing Office in Washington, D.C.

IDA C. MERRIAM,
Assistant Commissioner for Research and Statistics.

Notes		2–1
2.1	Persons enrolled as of July 1, for health insurance, by type of coverage, age, race, sex, region, division, and State of residence	2–2
2.2	Persons enrolled as of July 1, for health insurance, by type of coverage, age, region, division, and metropolitan-nonmetropolitan-residence	2–19
2.3	Persons enrolled as of July 1, for health insurance, by type of coverage, State, Puerto Rico, Virgin Islands, metropolitan-nonmetropolitan residence, and county	2–21
2.4	Persons enrolled as of July 1, for health insurance, by type of coverage, race, sex, population size groups of standard metropolitan statistical areas, and each area of 500,000 or more in 1965	2–44
2.5	Persons enrolled for health insurance, by type of coverage, age, race, sex, and month of coverage	2–46
2.6	All persons ever enrolled during 1969 for hospital and/or medical insurance, by age, race, sex, region, division, and State of residence	2–50

The Statistical System

THIS PUBLICATION is a section of a statistical report series produced from Medicare program records. Presented on a calendar year basis, describing services rendered in the year, the series includes sections on enrollment, characteristics of providers, inpatient care in hospitals and extended care facilities, outpatient hospital services, home health services, physicians' and other medical services, and overall summaries.

The primary objective of these reports is to provide data required to measure and evaluate program operation and effectiveness. Benefit payment operations furnish information about the amount and kind of hospital and medical care services used by persons aged 65 and over, as well as the expenditures for such services. The applications by hospitals, extended care facilities, home health agencies, and independent laboratories to participate in the program provide data on the characteristics of such providers of services. The claim number assigned to each individual serves as the link between the program services utilized and the demographic characteristics of each individual recorded in the health insurance entitlement master file.

The data-collection system has two inherent characteristics that determine the scope, detail, and flexibility of the available data. First, data are collected and maintained on an individual basis so that the beneficiary and his medical experience under the program form the basic unit. Second, records for each bill paid under the program and, for a sample of beneficiaries, records of diagnoses and surgical procedures are maintained on a centralized basis. Except for intermediary operating statistics such as those relating to workloads, costs, and the like, all program statistics are centrally prepared.

THE BASIC RECORDS

The statistical system is based on five related computer-tape records: the health insurance entitlement master file, provider record, hospital insurance (Part A) utilization record, medical insurance (Part B) payment record, and the record containing information from medical insurance bills for a 5-percent sample of supplementary medical insurance enrollees.

THE HEALTH INSURANCE ENTITLEMENT MASTER FILE

The health insurance entitlement master file identifies each aged person eligible for health insurance benefits and indicates whether he is entitled to hospital benefits, to supplementary medical insurance benefits, or to both of these benefits.

This record is used to create a health insurance card that is sent to each insured person. The card contains the individual's claim number (the number used for OASDI or railroad retirement programs). It indicates the entitlement of the individual for the two parts of the Medicare program.

The entitlement record provides the population data for each part of the program and therefore serves as the base for the compilation of a variety of utilization rates, limited only by its demographic content.

PROVIDER RECORD

Every hospital, home health agency, extended care facility, and independent laboratory must apply for participation in the hospital insurance program in order to be reimbursed for services provided. Data included on the application forms have been recorded in the central provider record and are updated as facilities are recertified periodically, as new ones apply for participation, or as some leave the program. When the information in this provider file is combined with utilization data, it serves to relate the characteristics of facilities and agencies that provide care to the kinds and amounts of service used by persons insured under Medicare.

UTILIZATION RECORD FOR HOSPITAL INSURANCE

The administration of the hospital insurance program requires that two items of information be known about each person at the time of his admission to a hospital—his entitlement under the program and the extent to which he has used the benefits available to him under the "benefit period" concept.

When the patient is admitted to a hospital, the admission section of the inpatient hospital admission and billing form is completed by the hospital and forwarded through its intermediary to the Social Security Administration for recording in the central record. As soon as the record is checked, normally in less than 24 hours, the intermediary is informed of the patient's benefit status and the number of days remaining during the "benefit period."

This information is then forwarded to the hospital. At discharge, the hospital completes the billing section of the form and sends it to the intermediary for payment. When approval for payment has been made, the intermediary forwards the claim to the Social Security Administration for inclusion in the central record.

As part of this process, information on diagnoses and surgical procedures are coded for a 20-percent

sample of beneficiaries based on specific combinations of digits in the health insurance claim number. Copies of admission and billing forms are handled in a comparable manner by home health agencies and extended care facilities. The outpatient billing form is also transmitted to the Social Security Administration for recording in the central record after the bill is approved for payment by the intermediary.

All the information on utilization experience in hospital and extended care facilities that is needed to administer the "benefit period" provision is recorded in the central record. This information includes stays in certain nonparticipating institutions that meet the definition of a hospital or extended care facility under the law, and days of care not covered or reimbursable under the program.

Each admission and billing form contains both the beneficiary's claim number and the provider's identification number. The resulting tape record can be readily matched to the beneficiary files and the provider files. By this process, a statistical tape record is created for the sample of insured persons that contains all the available information needed for tabulation from the three files related to Part A utilization.

PAYMENT FOR MEDICAL INSURANCE

Payment or reimbursement under the SMI program is made only after receipt by the carriers (intermediaries involved in Part B of the Medicare program) of bills having allowed charges exceeding $50 during a calendar year period.

For the insured population, carriers need to know from a central source that the deductible has been met; thereafter, during the remainder of the calendar year, the only additional information required from the Social Security Administration for reimbursement or payment purposes is whether the person is still enrolled under the SMI program.

For administration and operation of the program, the Social Security Administration must have accurate and complete information on the amounts paid by the carriers for physician services and for other services and supplies under this part of the program. To meet these needs, carriers furnish a payment record consisting of tape, punched card, or other machine-readable record of each bill paid. A "bill" is defined as a request for payment from or on behalf of a beneficiary as the result of services provided by a single physician or supplier.

The payment record also contains selected items of information needed to supply an efficient basis for drawing samples of the bills. These items provide a sampling frame that may be used to draw additional samples designed to obtain specific information not furnished reliably by the basic sample of enrolled persons under the medical insurance program.

THE MEDICAL INSURANCE SAMPLE

Although the payment record provides a rapid method for summarizing payment data and a sampling frame for efficiently drawing additional samples of bills, it does not provide specific data on diagnoses, procedures, and related charges.

Basic statistics on the utilization of physician and other services covered under the supplementary medical insurance program are derived from bills paid by intermediaries to or on behalf of a continuous 5-percent sample of all enrolled persons. Intermediaries have been given specific combinations of digits of the health insurance claim number to be used in selecting the 5-percent sample, which is a subsample of the 20-percent sample used for hospital insurance program data.

Bills are submitted either directly on an SSA request for payment form, or on the SSA form in combination with the physician's billing form. Both methods are designed to provide information on the date and place of each service, the procedure carried out or service provided, the condition treated (diagnosis), and the physician's or supplier's charge for the specific service.

All of the bills of persons in the 5-percent sample to or for whom payment is made under the program, including those used to meet the annual $50 deductible, are included in the sample and coded. However, data are not available through these procedures for persons in the sample who do not meet the $50 deductible. Such data are collected by means of the Current Medicare Survey, with data made available in a separate report series.[1]

For hospital-based physicians who have authorized the provider to collect the fee for their services, the provider billing for patient services by physicians form is used. This form is completed for each patient. It includes descriptive information on the date and place of each service, the diagnoses, procedures, and the charges. These bills are received centrally for the 5-percent sample of persons enrolled for supplementary medical insurance. Beginning April 1, 1968, it is also possible for the hospital to include payments for radiology and pathology services directly on the hospital bill.

Characteristics of The Enrolled Population

THIS REPORT presents data on the characteristics of the population enrolled in the Medicare program in 1969 and discusses changes in enrollment from the time the program took effect on July 1, 1966. The general tables present data by age, race, and sex and by State and county of residence. Most of the data were tabulated as of July 1, 1969, in order to provide a population base for measures of utilization of medical care services under the Medicare program.

Almost all persons aged 65 and over are entitled to hospital insurance. On July 1, 1969, 20.0 million persons aged 65 and over were enrolled for hospital insurance (HI) benefits under Medicare. Of this number, 19.2 million had voluntarily enrolled for supplementary medical insurance (SMI) (table A).

The growth in the number of persons enrolled for HI between 1966 and 1969—1 to 2 percent annually—reflected the excess of persons aging into the program over deaths of enrolled persons each year. On the other hand, enrollment in the SMI program is voluntary and requires payment of a monthly premium by, or on behalf of, the beneficiary. When Medicare began, almost 1.4 million persons who were entitled to HI had not enrolled for SMI; by July 1, 1969, this group had decreased to about 900,000. In addition, 88,000 persons who were not eligible for HI had enrolled for SMI.

Table A.—Medicare enrollment and annual percent increase, by type of coverage, July 1, 1966–69

Type of coverage	1966	1967	1968	1969

Supplementary medical insurance only	...	2.7	88.2	73.3

HI Enrollment

Type of entitlement.—Persons enrolled in the HI program may be described according to the characteristics recorded in the Health Insurance Entitlement (HIE) master file—age, sex, race, mailing address, and type of entitlement. About 90 percent of the persons entitled to HI benefits were receiving or entitled to receive social security benefits (table B) and 3 percent or 550,000 persons were receiving or entitled to receive railroad retirement benefits. Some 300,000 persons were entitled to both social security and railroad retirement benefits on the basis of earnings under both programs. These persons are reported both as entitled to social security benefits and entitled to railroad retirement benefits, but they are counted only once in the figures in table B for all enrolled persons. The balance of the enrolled population (7 percent) were not receiving cash benefits under either social security or railroad retirement. This group is entitled to HI coverage under the transitional provisions of the law. Compared with 1966, the figures reflect the transfer of persons who benefited under the provisions of Public Law 89–368 (known as the Prouty amendment) from the category "other enrolled persons" in July 1966 to "persons entitled to social security benefits."[1] Under this provision of the law, effective October 1966, persons aged 72 or older before 1968 were entitled to a monthly cash benefit

[1] Persons entitled to social security and railroad retirement cash benefits (299,000) are counted in each category separately but only once in total.

even though they had insufficient work credits to be insured under social security; but persons who attained 72 years of age in 1968 and 1969 were required to have earned at least 3 and 6 calendar quarters of work credits, respectively, to obtain these benefits.

Except for the proportion of persons with race not reported, there are only minor differences between the characteristics of railroad retirement beneficiaries and social security beneficiaries. Race was not reported for 17 percent of railroad retirement beneficiaries in contrast to only 1 percent for social security beneficiaries. The group remaining in the classification "other enrolled persons" consists in large part of women (73 percent), of persons 80 years and over (32 percent), and of persons reported as members of "all other races" (18 percent).

Age, race, sex.—With the growth of HI enrollment by nearly 1 million persons between 1966 and 1969, the characteristics of the population changed slightly. The proportion of women enrolled for HI has increased each year, particularly among the population aged 75 years and over:

Age and sex	Percent of total HI enrollment			
	1966	1967	1968	1969
65 years and over	100.0	100.0	100.0	100.0
Men	42.6	42.3	42.1	42.0
Women	57.4	57.7	57.9	58.0
Under 75 years	100.0	100.0	100.0	100.0
Men	44.2	44.0	44.0	44.1
Women	55.8	56.0	56.0	55.9
75 years and over	100.0	100.0	100.0	100.0
Men	39.9	39.4	39.1	38.7
Women	60.1	60.6	60.9	61.3

In 1969, as in earlier years, there were more women enrolled than men at every age and the ratio of women to men increased with advancing age.

By race, the enrollment of persons of all other races increased at a slightly faster rate than that of the white population (table C). The percentage distribution of HI enrollment by race since the beginning of the program is almost unchanged:

Race	1966	1967	1968	1969
Percent of total HI enrollment	100.0	100.0	100.0	100.0
White	89.3	89.2	89.2	89.2
All other races	7.6	7.7	7.7	7.8
Race unknown	3.1	3.1	3.1	3.0

Variation in the median age of the enrolled population by sex and race was also small. In 1969, the median age of the white population was greater than that of all other races (73.0, 72.4); and the median age of women was greater than that of men (73.4, 72.5). However, between 1966 and 1969, the enrolled population aged 75 years and over has increased faster than the population aged 65–74 years. The U.S. Bureau of the Census estimates the rise in the proportion of the total U.S. population 75 years and over to those 65 years and over is not expected to decline until the mid-1970's.[2] The increasing proportion of those 75 years and over is important to the Medicare program since the need for medical services increases with age.

Geographic distribution.—When the population entitled to hospital insurance in 1969 (table 2.1) is distributed by geographic region and division and compared with the same distribution for 1966, slight changes are noted. The South was the most populous region in 1969; when the program began, the largest enrollment was in the North Central States (table D). Between 1966 and 1969 there was a small decrease in the proportion of the white population living in the Northeast and North Central States and in the proportion of all other races living in the South. One-half

of the persons enrolled in 1969 resided in the contiguous band of States comprising the North Central region and the Middle Atlantic division (table E). The same concentration held for the white population, but, for persons of all other races, almost 60 percent lived in the South. The age composition among the geographic divisions also differs slightly (table F). For the United States, 39 percent of persons covered by HI were aged 75 years and over. In the South Atlantic division, 37 percent of the enrollment fell into this age group contrasted with 42 percent in the West North Central division. In every division women comprise the majority of the population.

Almost two-thirds of the persons covered by hospital insurance reported their place of residence to be a metropolitan county (table G). The proportion of persons living in metropolitan counties, however, showed considerable variation by geographic area. The Northeast had relatively the largest metropolitan population and the South the smallest. Three-quarters of the HI enrollees who lived in a metropolitan county resided in a standard metropolitan statistical area having a population of 500,000 or more in 1965 (table 2.4).

The increase in enrollment between 1966 and 1969 was observed in every area of the country, with one exception:

Percentage change in enrollment, 1966–69	Number of States [1]	
	Hospital insurance	Supplementary medical insurance
Total	51	51

The largest increase by region in the 3 years was 7.5 percent in the South, followed in descending order by 7.2 percent in the West, and 2.7 percent in both the North Central and Northeast States. The 16-percent increase in HI enrollment in Florida accounted for nearly one-third of the growth of enrollment in the South. The enrollment gains in Nevada and Arizona were even larger (18 percent). For Iowa and Massachusetts growth was less than 2 percent, and in the District of Columbia enrollment declined by 1 percent.

SMI Enrollment

Between 1966 and 1969, the number of persons enrolled for SMI increased by nearly 1.5 million persons, or about one-half million more than for HI. The increase between 1968 and 1969 alone in SMI enrollment was 390,000 (table A). Most persons enrolled for SMI when they became entitled to HI coverage. The excess SMI enrollment arises through additional opportunities to enroll provided to persons eligible for SMI: these opportunities are the annual general enrollment periods and those provisions of the Federal

Table G.—Percentage distribution of persons enrolled for hospital insurance, by region, division, and metropolitan or nonmetropolitan county of residence, July 1, 1969

law that permit States to enroll and pay SMI premiums for public assistance recipients (see below). The number of SMI enrollees ineligible for HI coverage, chiefly Federal employees and persons with no social security work credits, is also increasing.

The general enrollment period.—Persons who fail to enroll during their initial enrollment period are given additional opportunities to do so during the annual general enrollment periods (see Provisions of the Law). In the first general enrollment period, which ran from October 1, 1967, through March 31, 1968, about 1.3 million persons were identified as eligible to enroll and almost 650,000 did so. This enrollment was in effect on July 1, 1968. The 1969 general enrollment period ran from January 1 through March 31, 1969, and resulted in 250,000 of 900,000 eligibles electing coverage beginning July 1, 1969. This number accounts for most of the increase in enrollment between June and July 1969 shown in table 2.5.

State buy-in agreements.—The State "buy-in" provision of the Medicare law (Section 1843) also made additional enrollment possible. At the start of Medicare, 22 States elected to enroll and pay premiums for aged persons who receive cash payments under public assistance programs. Public Law 90–248 extended eligibility, effective April 1, 1968, to those who qualify for medical assistance programs. By the end of 1969, 40 States, the District of Columbia, Guam, and the Virgin Islands had signed buy-in agreements for particular categories of public assistance recipients (table H). During 1969, nearly two million public assistance recipients were enrolled (table J), or 575,000 more than the number enrolled in 1967. The highest proportion of buy-ins in the U.S. were in Georgia, Arkansas, Oklahoma, and Texas, where the State had paid the premiums for more than a quarter of the SMI enrollees.

"SMI only" enrollees.—The third group adding to the SMI enrollment are those persons ineligible for HI coverage. There were 88,000 such persons enrolled on July 1, 1969. They are persons who lacked the re-

[1] PA recipients entitled to OASDHI and RRB were covered under State "buy-in" agreements, except in Mass. and Wis. Coverage was effective July 1, 1966, except in California and Guam where coverage of beneficiaries began Jan. 1, 1967, and July, 1968, respectively.

[2] Definition of title numbers: 1—old-age assistance; 4—aid to families with dependent children; 10—aid to the blind; 14—aid to permanently and totally disabled; and 16—aid to aged, blind or disabled.

[3] Titles 4, 10, and 14 covered in Del. effective May 1, 1968; Iowa, July 1, 1967; S. Dak., Jan. 1, 1968; Tenn., Dec. 1, 1969; Va., Sept. 1, 1969; and Wis., Apr. 1, 1968.

[4] Title 4 covered in Maine effective Apr. 1, 1968, and Okla., Nov. 1, 1967.

[5] Coverage of medical assistance recipients terminated effective March 31, 1969.

quired work credits for HI eligibility, and Federal employees insured under the Federal Employees Health Benefits Act of 1959, who may pay the premium to enroll under SMI, but who are not entitled to HI.

Age, race, sex.—There was little difference in the distributions by race, sex, and median age of persons enrolled under the HI and SMI programs. This is to be expected since those enrolled for SMI benefits was almost 96 percent of those entitled to HI coverage (table K). The proportion of the total HI population enrolled in SMI, however, differed as between races. For the white population, 97 percent of persons enrolled for HI were also enrolled for SMI—6 percentage points more than for all other races. The excess for whites persisted in every age and sex group. Differences in participation rates by race within sex were small, with women for the most part exhibiting the higher percentage. Among all persons, the per-

Guam	671	46.1
Virgin Islands	1,307	43.4

[1] Based on data recorded as of January 6, 1971. State of residence is not necessarily the State that bought coverage.

[2] Percent of total population ever enrolled in HI and/or SMI as shown in table 2.6.

[3] Includes 2 persons whose address is in a State not having a "buy-in" agreement during 1969.

centage enrolled in SMI by age varied slightly. By 2-year age groups, the enrollment percentage was lowest (95.3 percent) for those aged 65 and 66 and highest (96.4 percent) for those aged 69 and 70. By 5-year age groups, the lowest and highest participation rates differed by only 1.4 percentage points.

Geographic distribution.—On July 1, 1969, among HI enrollees in the United States, nearly 97 percent were enrolled in SMI, 1 percentage point higher than for all persons enrolled in HI (table L). The lower rate in the total population resulted from the inclusion of two groups of SMI eligible persons with low participation—persons residing in the outlying areas (see table 2.1) and in foreign countries. Persons aged 65 and over living in foreign countries may not ordinarily be paid Medicare benefits for services provided in those countries. Circumstances that influence enrollment in SMI in outlying areas—average income, access to local provisions for medical care, etc.—may vary considerably from those prevailing in the United States. For all persons in the United States, regional differences in the percentage of HI enrollees in the SMI program has narrowed since the program began. By 1969, a difference of only 1 percentage point separated the participation rates in the West and the South, the regions of highest and lowest participation.

Table L.—Percent of persons in the hospital insurance program participating in the medical insurance program, by race, region, and division, July 1, 1966, and July 1, 1969

The percentage of SMI enrollment of white persons exceeded that of all other races in every geographic area of the country. Since the proportion of persons of all other races to the total population is small, their lower participation rate compared to that of the white population had little effect on the rate for the total population. This was true for every geographic area including the South, where the proportion of persons of all other races is largest.

Persons Newly Enrolled, and Persons Terminated

A total of 1,411,000 persons were newly enrolled under HI during 1969 (table M), an average of 118,000 persons a month. Most additions to the rolls were persons who had just attained age 65. The provisions for HI coverage also permit additions to the HI rolls at older ages. If a person files his application after he attains age 65, his HI protection can be retroactive for up to 12 months prior to the date he filed his application. Additions to the SMI program totaled 1,641,000 during 1969, exceeding the number of those newly enrolled for HI. Additions to the SMI rolls were higher than for HI because of the number responding during the general enrollment period.

Terminations.—During 1969, HI coverage was terminated for over 1 million persons who died (table N). Since termination of coverage occurs in the month following death, terminations in 1969 include deaths in the months of December 1968 through November 1969.

Table N.—Persons whose hospital or medical insurance was terminated during 1969 by race, sex, and reason for termination

Race and sex	Hospital insurance [1]	Supplementary medical insurance		
		Total	Death	Other
All persons	1,193,844	1,183,296	1,142,567	40,729

Women	32,919	33,591	31,370	2,221

[1] All hospital insurance terminations were due to death.

In calendar year 1969, 1,182,000 deaths among HI enrollees were recorded. Owing to differences in the population covered and in the source of the report of age at death as well as possible delays in recording deaths in the SSA file, these figures do not correspond exactly to data on deaths published by the National Center for Health Statistics.

During 1969, only 40,000 persons of the 19 million enrolled for SMI withdrew from the program, either by notifying the Social Security Administration or by not paying their premium. In the previous year, 80,000 persons had dropped their SMI coverage.

Source of Data

The HIE master file.—The data on age, sex, race, and place of residence of the enrolled population in this report are from the Health Insurance Entitlement (HIE) master file. Changes or corrections in the characteristics of the beneficiaries, new enrollments, and terminations are entered into the file at periodic intervals. Data for 1969 are from the HIE master file summarized on April 1, 1970, with one exception. Data for persons enrolled for SMI at any time during 1969 under State buy-in agreements (table J) were summarized as of January 6, 1971.

Place of residence.—The beneficiary's place of residence is defined as his mailing address, but this is not necessarily his actual place of residence. For example, some beneficiaries have their checks mailed to a bank, a post office, or to a representative payee in a State or county which may differ from the residence of the beneficiary. Temporary or permanent changes in address are shown as enrollees report them to SSA. Only the current mailing address is kept in the HIE master file and that address is classified as the place of residence. The address in the file on the date of tabulation is used for all tables.

Residence unknown.—There were nearly 9,000 persons with unknown residence recorded in the HIE file in 1969 (table 2.6). Most of these entries were the result of processing errors with respect to codes for States or foreign countries. In addition, the number of enrollees whose county of residence was unknown appears in table 2.3 for each State. These were addresses from which the county could not be determined or possibly processing errors.

Race unknown.—On July 1, 1969, the number of HI enrollees without a designation of race was 597,000, a decrease of 16,000 from the previous year. The decline was the result of a decrease among unknowns entitled to social security benefits and other enrolled persons that more than offset an increase among unknowns entitled to railroad retirement benefits. Women accounted for a decrease in unknowns of 26,000, while unknowns among men increased by 10,000. The increase in railroad retirement beneficiaries for whom race was not reported was the result of unresolved data exchange procedures between the SSA and the Railroad Retirement Board. The master records of the Board do not contain a designation of race. At the start of the Medicare program and at the request of SSA, the Board provided Medicare with race information. Since then no such information has been obtained for railroad retirement beneficiaries newly enrolled in the Medicare program. The following table summarizes changes by type of entitlement of HI enrollees classified "race unknown" between 1968 and 1969.

[In thousands]

Type of entitlement and sex	Hospital insurance		
	Number enrolled		Net change, 1968–69
	July 1, 1968	July 1, 1969	
Total race unknown [1]	613	597	−16
Men	160	170	10
Women	453	427	−26
Entitled to railroad retirement benefits	120	148	28
Men	61	79	18
Women	59	69	10
Entitled to social security benefits	269	253	−16
Men	42	41	−1
Women	227	212	−15
Other enrolled persons	227	201	−25
Men	57	50	−7
Women	170	152	−18

[1] Persons entitled to social security and railroad retirement benefits are counted in each category separately, but only once in total.

Persons enrolled as of July 1, 1969.—Enrollment data as of July has been selected as the population base for utilization rates to be published in other sections of the annual statistical report series. The choice was based on the similarity of July enrollment to a 12-month average enrollment. A comparison of HI enrollment by age, race, and sex on July 1, 1969, with an average of 12 months of enrollment in 1969, computed from table 2.5, showed close approximation.

Less satisfactory was July SMI enrollment which was consistently higher than the 12-month average enrollment. This was caused by the inclusion of persons whose coverage began on July 1 because they had signed up during the general enrollment period. The difference between SMI enrollment for July and the monthly average is diminishing because the number enrolled during each general enrollment period is declining. Moreover, deriving a monthly average enrollment from a fixed date of tabulation involves a possible understatement of the number enrolled, since enrollment data are less complete in the months closest to the date of tabulation.

Provisions of the Law

The health insurance program for the aged, commonly called Medicare, was enacted on July 30, 1965, as Title XVIII of the Social Security Act, and became effective on July 1, 1966. The program, a part of the 1965 amendments (Public Law 89–97), makes available two separate but coordinated insurance coverages—hospital insurance, covering nearly all persons aged 65 and over, and supplementary medical insurance, covering those persons in this age group who enroll voluntarily and pay the premium. Changes in the program, effective in 1968, were incorporated in the 1967 amendments to the Social Security Act (Public Law 90–248), enacted on January 2, 1968.

Hospital Insurance Program

The hospital insurance program (Part A of Medicare) pays for a large portion of the costs of hospital and related post-hospital services. It is financed on a self–supporting basis through a tax on a portion of current earnings, paid by employees, employers, and self–employed persons. The proceeds of this tax are placed in the Hospital Insurance Trust Fund, from which reimbursements for benefits and administrative expenses incurred under the program are paid. The trust fund is reimbursed from general tax revenues for the costs of providing coverage for persons who qualify for hospital insurance but who are not eligible for monthly social security or railroad retirement benefits.

Inpatient hospital benefits.—The program covers the cost of covered services in a participating hospital for up to 90 days in a "benefit period" (a period beginning with the first day of hospitalization and ending 60 days after discharge from a hospital or a skilled nursing home). Full payment is made for the first 60 days of hospitalization after a deductible of $44 has been paid. For each of the remaining 30 days in the benefit period, the patient pays a coinsurance amount of $11 a day.

Each hospital insurance beneficiary also has a "lifetime reserve" of 60 additional hospital days, subject to a copayment of $22 a day. These additional days can be used at the patient's option whenever the 90 days covered in a benefit period are exhausted.

The program also provides benefits for emergency services rendered in a nonparticipating hospital. Each nonparticipating hospital providing emergency services elects whether to bill the program or to charge its patients directly. If they bill the program, they are reimbursed on the basis of reasonable costs of covered services rendered. If they bill the patient, he pays the bill and submits the itemized bill to SSA for reimbursement. The reimbursement paid is 60 percent of reasonable charges for room and board and 80 percent of the charges for ancillary services.

Inpatient tuberculosis and psychiatric hospital services are also covered. However, there is a lifetime limit of 190 days of care in a psychiatric hospital. Where an individual is a patient in a participating psychiatric hospital at the time he becomes entitled to hospital insurance, the number of days he was such an inpatient in the 150–day period immediately prior to his eligibility are deducted from his days of entitlement in that benefit period but not from the lifetime limitation.

Covered hospital services include hospital room and board in accommodations containing from two to four beds, nursing services except for private-duty nursing, drugs and biologicals, and all those services ordinarily furnished by a hospital to its inpatients. Coverage under the hospital insurance program does not include the services of physicians (including radiologists, anesthesiologists, pathologists and physiatrists) except for those services provided by interns or residents in training under approved teaching programs in a hospital.

The cost of the first three pints of blood (or equivalent amounts of packed red blood cells) furnished a patient during a benefit period is a deductible amount unless the patient arranges for replacement. Charges for any additional blood are covered under the program.

Post-hospital home health care benefits.—These benefits cover the cost of visiting nurse services and related home health services for as many as 100 visits for up to a year following the patient's most recent discharge from a hospital or participating extended care facility, provided he has been confined for at least 3 consecutive days in a hospital. A home health plan must be developed by a physician and implemented within 14 days after the patient's dis-

charge from the hospital or extended care facility. The home health care must be for further treatment of a condition for which he received services in the hospital or extended care facility.

Extended care facility benefits.—The program pays for the reasonable cost of all covered inpatient services in participating extended care facilities (ECF) for up to 100 days of such care in any benefit period, following discharge from a hospital after a stay of 3 consecutive days or more, and admission to an ECF within 14 days of discharge. Full payment is made for the first 20 days. For each of the remaining 80 days, the patient pays a coinsurance amount of $5.50 a day for benefit periods beginning after 1968. (The extended care coinsurance amount is set by law as one-eighth of the inpatient hospital deductible).

Supplementary Medical Insurance Program

The supplementary medical insurance program (Part B of Medicare) provides coverage of physicians' services, outpatient diagnostic and therapeutic services, additional home health services, other medical services and supplies, and outpatient physical therapy services. Individuals 65 years of age and over may enroll in the program regardless of whether they are eligible for social security retirement benefits. Monthly premiums paid by the individual are matched by the Federal government and paid into the Supplementary Medical Insurance Trust Fund, which reimburses carriers for benefits and administrative expenses incurred under the program.

The SMI program pays for 80 percent of the allowed charges for covered physician services and other medical services (or 80 percent of reasonable cost), after the patient has met a deductible of $50 during a calendar year. However, payment for outpatient psychiatric physician services is limited to the lesser of $250 or 50 percent of the allowed charges in any year after the $50 deductible has been met. The sum and percentage are derived from the statutory provision which permits an incurred expense for out-of-hospital treatment of mental illness of only $312.50 or 62.5 percent of actual expenses in a calendar year. Since only 80 percent of allowed charges can be reimbursed the effective maximum becomes $250.

To preclude the possibility of having to meet a deductible twice in a short period of time, a "carryover" provision is applied. Accordingly, covered expenses that are incurred in the last quarter of the year and counted toward the deductible in that year are also credited toward the deductible for the following year. However, the provisions concerning the deductible and the coinsurance do not apply to the services of radiologists and pathologists furnished to hospital inpatients.

Covered under the program are such benefits as physicians' services, including home, hospital, and office visits; services and supplies, including drugs and biologicals that cannot be self-administered, that are furnished as a part of a physician's professional service, most commonly in his office, and either rendered without charge or included in the physician's bills; diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests; X-ray; radium, and radioactive isotope therapy, including materials and the services of technicians; surgical dressings, splints, casts, and other devices used for reduction of fractures and dislocations; purchase or rental of durable medical equipment, including iron lungs, oxygen tents, hospital beds, and wheelchairs used in the patient's home (including an institution used as his home); ambulance service in cases where the use of other methods of transportation is contraindicated by the individual's condition; prosthetic devices (other than dental) that replace all or part of an internal organ, including replacement of such devices; leg, arm, back, and neck braces, and artificial legs, arms, eyes, including replacement if required because of a change in the patient's physical condition; and 100 home health visits during a calendar year—these visits being independent of those provided under the hospital insurance program.

Also covered are hospital services incident to physicians' services rendered to outpatients, and outpatient physical therapy services.

Eligibility

The Hospital Insurance Program.—Almost all persons aged 65 and over are eligible for benefits under the hospital insurance program. Included are those persons in this age group who are entitled to monthly social security cash benefits or payments from the railroad retirement system, regardless of whether they have applied for these cash benefits. During the period under consideration, a person could apply for hospital insurance protection even though he did not qualify for either social security cash benefits or a railroad retirement annuity if (1) he had attained age 65 before 1968, or (2) he would attain age 65 after 1967 with not less than three quarters of social security coverage, whenever acquired, for each calendar year elapsing after 1966 and before the year in which he would attain age 65; however, hospital insurance protection could not go into effect until the individual attained age 65. These two classes of individuals were "deemed insured" under a special transitional provision.

For persons who reach age 65 after 1968, the amount of work credits needed increases by three quarters each year—six quarters are needed by those who reached age 65 in 1969, nine will be needed by those who reach 65 in 1970, and so on. However, a person who qualifies for monthly benefits as the dependent or survivor of an insured worker does not need any work credits.

Under the 1967 amendments, States are permitted to enter into agreements with the Secretary, based on a request made before January 1, 1970, to buy in—that is, to pay the medical insurance premiums—for public assistance recipients aged 65 or over who were receiving money payments under an approved public assistance plan and for all aged persons eligible to receive medical assistance under an approved Title XIX plan.

Administration of the Program

Hospital Insurance.—Under the hospital insurance plan, groups or associations of providers, on behalf of their members, may nominate a national, State, or other public or private agency or organization to serve as intermediary in the claims process. A member of an association is free, however, to receive payment from an approved intermediary other than its association's nominee, if approved by the Secretary and agreeable to the intermediary selected. In addition, a provider may deal directly with the Social Security Administration.

The Secretary may enter into an agreement with a nominated organization if he finds this to be consistent with effective and efficient administration of the hospital insurance program. The intermediary makes payments to providers for covered items and services on the basis of reasonable cost determinations and assists in the application of safeguards against unnecessary utilization of covered services. The agreement may also call for (1) furnishing consultative services to assist providers to establish and maintain necessary fiscal records and otherwise qualify as providers of services, (2) serving as a center for communicating with providers, and (3) making audits of provider records. Generally speaking, the Social Security Administration utilizes the services of the hospital insurance intermediary in making payments for home health and outpatient hospital services covered under medical insurance.

Payment may be made for a beneficiary for covered emergency inpatient hospital services or covered emergency outpatient hospital services where the hospital is not a participating facility and agrees not to charge the beneficiary for covered services. Such a hospital may be outside the United States if it is more accessible than the nearest hospital in the United States adequately equipped to treat the patient.

Requests for payment for covered services must be signed by the beneficiary (or someone for him, if he is unable to do so). Payments are made on the basis of reasonable costs for these services to participating providers of services, that is, hospitals, extended-care facilities, and home health agencies, who have been certified for participation.

In some instances, hospitals may bill for physician services rendered to inpatients. In these cases, payment is made by the Part A intermediary. Depending on the nature of the billing, funds are transferred from the SMI trust fund to the HI trust fund to cover the cost of these services, or are paid directly from the SMI trust fund.

The intermediary selected by the provider reviews the claims for payment and pays the provider. Actual payment is made on the basis of an interim rate established between the provider and the intermediary. Final settlement based on each provider's operating year is made on the basis of a cost report submitted by the provider, and subject to an independent audit.

No payments can be made to Federal providers of services except for emergency services, unless this provider serves as a community institution. In addition, payment cannot be made to a provider for those services it is obligated to render at public expense under Federal law or contract.

Supplementary Medical Insurance.—Under the medical insurance program, the Secretary of Health, Education, and Welfare may enter into contracts with carriers for the performance of specified administrative functions. The carriers' principal function is to determine whether charges are allowable (reasonable) and to make payment.

The carrier selected by the Secretary of Health, Education, and Welfare to serve as an intermediary determines the allowed charges for bills submitted for each medical care service covered by the program and pays 80 percent of this amount after the $50 deductible has been met.

The allowed charge for the service may be paid to the patient, or the patient may assign the bill for collection to the physician or other supplier of the service, if he is willing to accept assignment. In the former situation, the patient submits an itemized bill to the carrier and is reimbursed; in the latter, the physician or other supplier submits the bill and is reimbursed. When the payment is made directly to the physician (or supplier) on assignment, the allowed or reasonable charge determined by the carrier is the total charge. In both situations, the patient is responsible for the first $50 of the charges for covered services he receives during the year and the amount of the bill over 80 percent of the allowed charges.

The law instructs the carrier to consider the following criteria in determining the "allowed" charge:

(1) the customary charge for the service generally made by the physician or other person furnishing such services; and
(2) the prevailing charge in the locality by other physicians and suppliers for similar services.

The law also specifies that the "allowed" charge cannot be higher than the charge applicable for the similar service rendered under comparable circumstances to the carriers' own policy holders or subscribers. For the year 1969, carriers were instructed

Federal employees who retired from the Federal service after July 1, 1960, and who had the opportunity to be covered under the Federal Employees Health Benefits Act of 1959, are ineligible for hospital insurance benefits under the transitional provisions. Also ineligible are aliens with less than 5 years of continuous residence in the United States, and those persons convicted of crimes against the security of the United States.

Hospital insurance protection can be retroactive for as many as 12 months before the month an individual files his application for entitlement. For example, an individual may apply 11 months after he attains age 65 and still be entitled to benefits from the month he attained age 65.

Supplementary medical insurance.—Persons entitled to benefits under the hospital insurance program (Part A), retired Federal employees and persons not eligible for hospital insurance under the transitional provisions may voluntarily participate in the SMI program.

Enrollment.—Individuals may enroll in the SMI program only during specified periods—the initial and the general enrollment periods. The initial enrollment period begins with the third month preceding the one in which an individual attains age 65 and ends 3 months after the month of attainment, a total period of 7 months. If he enrolls during the 3 months prior to the month in which he attains age 65, his coverage is effective with the month in which he attains age 65; if he enrolls during the month he attains age 65, his coverage begins the following month; if he enrolls in any of the 3 months after he attains age 65, his coverage begins from 2 to 3 months after enrollment, depending on how long he waited before enrolling.

The most recent general enrollment period was set between January 1, 1969, and March 31, 1969, for those who did not enroll in their initial enrollment period, or who having terminated their enrollment now wished to reenroll. Comparable periods are set to occur in every year. A person who enrolls during a general enrollment period may receive benefits starting on the first of July following the general enrollment period. An eligible individual must enroll within 3 years after the close of his initial enrollment period or within 3 years after termination of prior enrollment.

A State may enroll otherwise eligible individuals who receive cash payments under public assistance programs if the State requests such a State–Federal enrollment agreement to be established and pays the necessary premiums.

Enrollment terminates with the beginning of the month following the month of death. Up to April 1, 1968, railroad retirement beneficiaries and individuals entitled to monthly cash social security benefits could terminate their enrollment voluntarily by notifying the Social Security Administration in writing during a general enrollment period of the desire to withdraw from the program. Under the 1967 amendments effective April 1, 1968, beneficiaries may give notice of withdrawal at any time and their coverage will be terminated at the close of the following calendar quarter. Other enrolled persons may terminate their coverage by withholding payment of premiums or by notifying the Social Security Administration in writing of the desire to withdraw from the program. The enrollee is provided a 90–day grace period for the payment of overdue premiums after which coverage is automatically terminated. An individual who previously has terminated his enrollment may reenroll only in a general enrollment period beginning within 3 years of the date his previous enrollment had terminated. Reenrollment, however, is allowed only once.

Financing the Program

Hospital Insurance.—The hospital insurance program is financed on a long-range, self-supporting basis through a separate schedule of increasing tax rates on the first $7,800 of earnings in employment covered under the Social Security Act. The same tax rate applies to employees, employers, and self-employed persons. This rate was 0.60 percent for 1968–1972, and is scheduled to increase until it is 0.90 percent in 1987 and thereafter. The proceeds of this tax and that collected from the railroad retirement system are placed in a Hospital Insurance Trust Fund from which reimbursements for all benefits and administrative expenses incurred under the hospital insurance program are paid. The hospital insurance trust fund is reimbursed from general tax revenues for the cost of providing coverage for the almost 2½ million persons who qualify for hospital insurance but who do not receive monthly social security or railroad retirement benefits, that is, those "deemed insured."

Supplementary Medical Insurance.—Premiums are paid into the Federal Supplementary Medical Insurance Trust Fund by those persons enrolled for supplementary medical insurance (or on their behalf), and a matching amount is paid from general revenues by the Federal government.

The premiums of persons receiving social security cash benefits, railroad retirement, or Federal Civil Service annuities are deducted from their monthly benefit checks. Persons not receiving monthly benefits are billed quarterly for premiums by the Social Security Administration or the Railroad Retirement Board and have a 90–day grace period in which to make payment. Premiums may be paid for as long as a year in advance, and for individuals financially unable to make quarterly payments, arrangements can be made for monthly payments.

The monthly premium during 1969 was $4 a month. The premium rate of the supplementary medical insurance program may be adjusted annually if medical costs rise.

to maintain allowed charges at the levels existing at the beginning of the year.

Carriers also have the authority and responsibility to determine, in a given case, whether a claim is for a covered service and to deny claims for noncovered or excluded items or services. In addition, carriers are to assist in the application of safeguards against unnecessary utilization of services furnished eligible individuals.

Most services covered by the medical insurance program are rendered on a fee–for–service basis. However, services furnished under group practice prepayment plans are normally rendered in return for predetermined premium payments. In recognition of the need for special adaptation of the Medicare payment procedures for services rendered by group practice prepayment plans, the law provides that an organization which furnishes medical and other health services (or arranges for their availability) on a prepayment basis, may elect to be paid 80 percent of the reasonable cost of services in lieu of 80 percent of the allowed charge for such services.

The 1967 amendments to the Social Security Act introduced a time limit on filing of claims. For bills incurred in the supplementary medical insurance portion of the program after March 1968, claims must be filed no later than the close of the calendar year following the year in which the services are furnished. For services provided during the last 3 months of the calendar year, bills may be submitted through the end of the second year following.

General Tables

Notes

Health insurance for the aged.—The program, commonly known as Medicare, that pays for part of the costs of hospital and medical services for participating persons aged 65 and over.

Type of coverage.—The program provides two types of insurance: a basic hospital insurance plan (part A) and a voluntary supplementary medical insurance plan (part B).

Personal characteristics.—

Age: In completed years at last birthday on the reference month of the table. A person is considered to have attained age 65 on the day preceding his 65th birthday.

Race: White, all other races, or unknown as entered into the HIE master file from basic records completed by the primary beneficiary. Race unknown, whether or not specifically indicated in a table, is included in the "all persons" or equivalent totals. Race is shown for a standard metropolitan statistical area if either of the following pertains: (1) there were 10,000 or more enrollees of all other races in the area in the hospital insurance program on July 1, 1969, or (2) at least 10 percent of enrollees in the area covered under the hospital insurance program were enrollees of all other races.

Sex: As designated in the HIE master file.

Persons ever enrolled.—All persons eligible for benefits under hospital insurance and/or supplementary medical insurance at any time during 1969.

Geographic classifications.—Based on the address to which the enrollee's cash benefit check is being mailed or the mailing address recorded in the HIE master file on April 1, 1970, regardless of the reference date of the table, except for data for persons enrolled for SMI at any time during 1969 under State "buy-in" agreements, which were summarized on January 6, 1971.

All areas: Consists of the United States, Guam, Puerto Rico, Virgin Islands, other outlying areas, and foreign countries.

United States: Consists of the 50 States, the District of Columbia, and residence unknown.

Outlying areas: Consists of American Samoa, the Canal Zone, Canton Island, Caroline Islands, Mariana Islands, Marshall Islands, Midway Islands, and Wake Island.

County.—The primary divisions of the 50 States are counties. In Louisiana, however, the divisions are known as parishes. Alaska is divided into 21 economic areas, included here as the equivalent of counties. A number of cities that are independent of county organizations are reported separately in Maryland, Missouri, and Virginia. Beginning with this report, data for Virginia are shown separately for Lexington and Salem, which became independent of Rockbridge County on January 1, 1966, and January 2, 1968, respectively, and Emporia, which became independent of Greensville County on July 31, 1967. Bedford City, which became independent of Bedford County on September 1, 1968, will be shown separately in the 1970 report. In Puerto Rico divisions are called municipios.

County unknown.—Persons whose mailing address does not permit identification of county of residence are included in figures for States but not in figures for metropolitan and nonmetropolitan counties or for SMSA's, with one exception. Where there is only one type of county in a State, figures for county unknown are assigned to that type.

Metropolitan and nonmetropolitan counties.—The division of counties into metropolitan and nonmetropolitan groups is based on the list of standard metropolitan statistical areas (SMSA) as classified by the Bureau of the Budget.[1] Except in New England, each SMSA includes a county that contains a central city of at least 50,000 inhabitants. In addition, contiguous counties are included in the SMSA if they meet certain criteria of economic and social integration with the central city. In New England, an SMSA consists of towns and cities, rather than counties. However, the mailing address in the HIE master file is coded only for State and county. Therefore, for New England, the SMSA was replaced by the metropolitan State economic area (SEA) which is defined in terms of whole counties. Metropolitan counties are those counties that are included in an SMSA or a metropolitan State economic area. These counties are further divided into those with a central city and those without a central city. Nonmetropolitan counties are those that fall into neither an SMSA nor a metropolitan SEA.

SMSA, Metropolitan SEA.—See above. Only areas in the United States are listed.

Other Data Sources On The Health Insurance For The Aged Program

The *Health Insurance Statistics* series is designed to present current, quick-release data from the Medicare program. Two report series are issued in this format:

The Health Insurance (HI) series has included 30 releases since 1967. Issues released prior to 1970 are out of print, but available in many libraries.

The Current Medicine Survey (CMS) series, based on data from the continuing Current Medicare Survey, has included 15 releases since 1967. These issues are available in most libraries.

Future releases in the HI and CMS series may be obtained upon request to the Publications Staff, Office of Research and Statistics, Social Security Administration Room 1020 Universal North Bldg., 1875 Connecticut Ave., N.W., Washington, D.C. 20009.

The *Social Security Bulletin*, published monthly, presents authoritative articles and analyses of medical care expenditures, prices, and utilization, as well as current operating statistics from the Medicare program. The *Annual Statistical Supplement* to the *Bulletin* includes summary data on trust funds, services, claims, enrollment, average charges, and participating providers of service under Medicare. The *Bulletin*, including the Supplement is available in most libraries and by subscription at $4 a year from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The *Research and Statistics Note* series reports on-going research, preliminary findings, or provides addenda to material already published on the old-age, survivors, disability, and health insurance program. Designed to get information quickly into the hands of users, the series includes data on medical care prices, outlays, and expenditures. The series is available in many libraries. Future releases may be obtained upon request to the Publications Staff, Office of Research and Statistics, Social Security Administration, Room 1020 Universal North Bldg., 1875 Connecticut Ave., N.W., Washington, D.C. 20009.
